

Oleg Janeiko
Frontend Engineer

(415) 314-0797
jneiku@gmail.com

11 years experience specializing in **JavaScript** and **Frontend Web Development**

Key skills:

- All things JavaScript! **Node** and **React**
- MongoDB, ActiveRecord, MySQL, Postgres
- Rails, PHP
- Test Driven Development, Unit & Integration tests, Continuous Integration
- Docker, AWS, Heroku, Linux

Experience:

Apple (Cupertino, CA)

07/2015 – present

Stack: Node, React, Ember, Docker, Postgres, Python, TensorFlow

Department: Apple Product Documentation

Main focus: Building internal tools for publishing support content.

Fun stuff: Leading a Machine Learning 20% Project

Sharethrough (San Francisco, CA)

10/2014 – 06/2015

Stack: Rails, CoffeeScript, Backbone, Jasmine/RSpec, Android SDK, Chef, AWS + Heroku

What: Fast growing startup in native advertising space.

Core products: Publisher's tag application (3 billion hits per month), reporting and data analytics pipeline, campaign creation, dynamic asset resizing service, Android and iOS SDK support.

Dgrees

Personal Project

Stack: Backbone, PhoneGap, Require.js, Grunt, Sass, Chai w/Mocha

What: A Celsius/Fahrenheit converter and game with a brain hack to make you fluent in both systems.

Main focus: Well thought out UX, minimalistic UI and highly popular in niche category.

AOL Mail (Palo Alto, CA)

06/2012 – 06/2013

Stack: Google Closure, Closure Compiler, Java backend, Sass, JsUnit

What: A full featured Mail web application for Tablets and Phones with native-like CSS transitions and loads of functionality.

Main focus: Working closely with designers to polish animations and achieve great UX, native-like web app performance, modular structure, memory optimized to run on the original iPad and early Kindle in the early days of Single Page Applications.

Zootoo (New York - Remote)

12/2008 – 04/2011

Stack: HTML, LESS, PHP, jQuery

What: Pet lovers social network

Main focus: Built a clean frontend framework and dramatically optimized load performance. Managed a remote team of frontend engineers and maintained a personal Linux sandbox.

DIP Studio (Vilnius, Lithuania)

12/2005 – 12/2008

Stack: HTML, CSS, JavaScript, PHP, Python

What: Web Development and Online Advertising Consulting Agency

Main focus: First job as a web developer, I learned about Web 2.0, semantics, agile development, SEO, good design and usability.
