Oleg Janeiko
Frontend Engineer

(415) 314-0797
jneiku@gmail.com

10 years experience specializing in `Front-end Development` and `JavaScript`

Key skills:

- Javascript: `CoffeeScript` , `ES6 w/Babel` , `Ember` , `Backbone` , `Google Closure` , `PhoneGap` , `jQuery`
- Build tools & utility: Gulp, Grunt, Yeoman, npm, require.js
- Backend: `Rails` , `Node` , `PHP` + some `Android & iOS`
- `Unit + Feature Testing` : Jasmine, Mocha, JsUnit, RSpec, Capybara, Nightwatch
- Git PRs + code reviews, continuous integration, pair programming
- Deployment: AWS: (EC2, ELB, CloudFront, S3) + Heroku, Jenkins

Experience:

Apple   07/2015 – present
What: Three month contract working on a web application for El Capitan.

Sharethrough   10/2014 – 06/2015
Stack: Rails, CoffeeScript, Backbone, Jasmine/RSpec, Android SDK, Chef, AWS + Heroku
What: Fast growing startup in native advertising space.
Main focus: JavaScript app that is served more than 3 billion times a month.
Day to day: Incremental improvements across the network: reporting, campaign creation, in-app SDK implementations, increasing fill rates

Dgrees   Personal Project
Stack: Backbone, PhoneGap, Require.js, Grunt, Sass, Chai w/Mocha
What: A Celsius/Fahrenheit converter and game with a brain hack to make you fluent in both systems.
Main focus: Well thought out UX, minimalistic UI and smooth animations.

AOL Mail   06/2012 – 06/2013
Stack: Google Closure, Closure Compiler, Java backend, Sass, JsUnit
What: A full featured Mail web application for Tablets and Phones with native-like CSS transitions and loads of functionality.
Main focus: Working closely with designers to polish animations and achieve great UX, matching performance of native apps, building the client application from scratch to interact with existing Java backend.

Zootoo   12/2008 – 04/2011
Stack: HTML, LESS, PHP, jQuery
What: Pet lovers social network
Main focus: Built a clean frontend framework and dramatically optimized load performance. Managed a remote team of frontend engineers and maintained a personal Linux sandbox.

DIP Studio   12/2005 – 12/2008
Stack: HTML, CSS, JavaScript, PHP, Python
What: Web Development and Online Advertising Consulting Agency
Main focus: First job as a web developer at my uncle's studio, I learned about Web 2.0, semantics, agile development, SEO, good design and usability.
